Good Governance and Public Finance Management	20
Other support measures	5
<b>Total</b>	<b>200</b>

#### Sector 1: Energy for development

**General objective:** to improve socio-economic development of both urban and rural populations through usage of clean, reliable, sustainable and affordable energy

**Specific objectives:**

- ✓ Access to increased and diversified electricity supply from renewable energy sources
- ✓ Increased energy efficiency
- ✓ Increased food security and employment and enhanced provision of social services through reliable energy supply with standalone systems

**Expected results:**

- Increased electricity generation capacity connected to the ICS
- Increased access to electricity through the ICS
- Preliminary studies and exploration phase completed for geothermal field at Alid
- Distribution grids in Asmara and Massawa are rehabilitated
- Energy saving technology such as LED lights installed and used
- Recycling and reprocessing system established for PV components
- Expansion of LPG storage and distribution facilities to rural areas
- Fishing and farming communities as well as SMEs gain access to reliable electricity supply
- Increased income of beneficiary communities from fishing and farming activities and SMEs
- Improved provision of social services through enhanced electricity supply
- Decent jobs created for installation, operation and maintenance of PV and wind powered energy generation systems

#### Sector 2: Good governance and Public Finance Management

**General objective:** to contribute to improved economic governance, accountability and efficiency of Government service delivery.

**Specific objective:**

- ✓ To improve the public financial management capacity of the Government of the State of Eritrea

- ✓ To strengthen macro-economic policies geared towards the creation of decent jobs, increasing productivity and improving investment climate
- ✓ To increase the capacity of the Government of the State of Eritrea in delivering services, such as affordable and clean energy
- ✓ To increase the capacity of the Government of the State of Eritrea in the follow-up and implementation of the UPR recommendations

**Expected results:**

- Availability and access to timely, reliable, comprehensive and quality statistics is improved
- Human, organisational and institutional capacities of National Statistics Office strengthened
- Macro-economic policies enable the private sector to contribute to Government of the State of Eritrea development objectives
- Capacity of the Ministry of Labour and other institutions in charge of labour market policy and employment generation enhanced
- Updated investment code and capacity and streamlining of the institutions in charge of developing the business climate and investment promotion strengthened
- Planning, policy and management of the energy sector is improved
- Capacity of Government of the State of Eritrea institutions to address and operationalise agreed UPR recommendations is increased
