

National Indicative Programme 2014-2020

TANZANIA

11th EDF 2014-2020

General overview of the programme

Intervention Area	Budget (MEUR)
Governance	291
Energy	180
Agriculture	140
Civil Society	3
Other support measures	12
Total	626

Sector 1: Governance

General objective: Support the Government of Tanzania's efforts to reduce poverty by implementing its main development strategies covering the period 2014–2020.

Specific objectives:

- ✓ Promote inclusive, sustainable and employment-based economic growth;
- ✓ Strengthen human capital and social safety through improved quality and equity in the provision of social services;
- ✓ Enhance the effectiveness and accountability of public administration through improvements in public financial management and increased transparency.

Expected results:

- Increased productivity in key sectors of growth, such as agriculture, transport and energy;
- Improvements in the business environment, through key policy reforms such as energy, taxes and trade across borders
- Improvements in key quality indicators of service delivery
- Reduced disparities in accessing social services.
- Improvements in the quality and effectiveness of public financial management including revenue management and internal and external control
- A more accountable public administration with respect to transparency, citizen participation and integrity

Sector 2: Energy

General objective: Enhance the contribution of the power sector to inclusive and sustainable economic growth

Specific objectives:

- ✓ To improve sector governance and support sector reforms to sustain energy access goals, enhance energy security and trade and ensure efficient service delivery also through increased private sector participation;
- ✓ To increase access to electricity and modern energy services.

Expected results:

- Road map for sector reform, addressing also aspects of sustainability, approved and implemented
- Increased energy efficiency and use of renewable energies
- Capacities of Ministry of Energy and Minerals (MEM), other government agencies and key stakeholders improved in order to secure better guidance and governance within the gas sub-sector
- Access to energy increased by: Rural grid extension through REA's turn-key programmes, densification projects (last mile infrastructure), development of mini-grids based on renewables, as well as institutional PV systems
- Capacities at REA and other key stakeholders enhanced.
- Renewable energy systems introduced in Zanzibar.

Sector 3: Agriculture

General objective: Improve the sustainability of and increase the wealth created by the agricultural sector and reduce vulnerability in the context of a changing climate.

Specific objectives:

- ✓ Generate agriculture wealth, through linking farmers to markets and value chains;
- ✓ Improve food and nutrition security, through improved access, availability, use of food;
- ✓ Enhance management of natural resources, including forests, and ecosystem services for sustainable agriculture development and climate change adaptation.

Expected results:

- Quality and standards are improved and disseminated to farmers, contributing to productivity increase
- Farming as a business and value chain development is promoted and increased
- Supply side constraints are addressed with the development of rural infrastructure (rural and feeder roads, storage and market infrastructure, small scale irrigation schemes) in areas of high agricultural potential
- Diversification of food production and awareness on nutritious food are promoted and increased, resulting in consumption of adequate diet, in particular among women and young children
- Innovative agricultural practices are introduced and disseminated to increase efficiency of natural resources use including biomass, strengthen climate resilience of farming systems and increase carbon sequestration
- Sustainable land management and land tenure security is enhanced.

Civil Society

In line with EU Agenda for Change, an allocation of 3 MEUR will be made available to promote private sector, employment and economic development. Actions in favour of Civil Society are also embedded in the focal sectors. First, the GGD foresees a Democratic governance and accountability "accompanying measure" that will support Civil Society Organisations' empowerment in monitoring Government accountability. Within the Sustainable Agriculture sector, specific projects will support and strengthen the role of civil society organizations in raising awareness on nutrition issues as well as on promoting sustainable natural resources and land management in rural areas.

Other support measures

Funding will be mobilised through a Technical Cooperation Facility (TCF) to support or accompany the programming, preparation and implementation of actions foreseen in this NIP. This will also fund where necessary analytical work, policy advice, knowledge sharing and capacity development (through conferences or training) as well as visibility related actions. The proposed allocation of 4 MEUR will support certain key NAO functions over the entire duration of the 11th EDF, such as in particular a well-functioning Monitoring & Evaluation system focussing on enhancing a results oriented approach for EU funding. Particular emphasis will also be put on ensuring the right level of visibility for the EDF interventions.
