

National Indicative Programme 2014-2020

TOGO

11th EDF 2014-2020

General overview of the programme

Intervention Area	Budget (MEUR)
Governance and Security	100
Water and Sanitation	73
Energy	30
Other support measures	13
Total	216

Sector 1: Governance and Security

General objective: Togo's population is reconciled within the republican institutions of a state that ensures national cohesion, inclusive and sustainable development of the country and the security of citizens.

Specific objectives:

- ✓ Completion of the process of national reconciliation in transitional justice and strengthening of democracy, as well as guaranteeing social peace;
- ✓ Citizens have a reliable and independent judiciary (the entire judicial system, including law enforcement)
- ✓ The implementation of public policy is made more efficient by improving the management of public finances and the quality of national statistics, including the inclusion of sustainable development dimension.

Expected results:

- The foundation for national reconciliation and peace are consolidated
- Election cycles are conducted credibly and performance of democratic institutions is improving
- The capacity of institutions of justice have improved
- Quality, consistency and publication of national statistics for the formulation and monitoring of public policies has improved
- The Ministry of Economy and Finance is modernized and operates under the new guidelines of Public Financial Management (PFM)

Sector 2: Water and Sanitation

General objective: The living conditions of the people are improved by a sustainable and resilient access to water and household sanitation.

Specific objectives:

- ✓ The population's access to drinking water and domestic and community sanitation levels are increased;
- ✓ Public agencies in charge of water and sanitation, but also decentralized and centralized municipal level, are able to fulfill their role and mission of public service as part of an integrated management water system.

Expected results:

- The population's access to drinking water and domestic and community sanitation levels are increased
- Strengthening and extension of the drinking water system and household sanitation infrastructure (built or rehabilitated)
- Strengthening infrastructure community sanitation
- Improving systems for solid waste management
- Programming capabilities and actions of public bodies responsible for water and sanitation are reinforced
- The technical and financial capacity of municipalities allow operate and maintain municipal infrastructure.

Sector 3: Energy

General objective: The living conditions of the people are improved through improved access to modern and sustainable energy services

Specific objectives:

- ✓ The access to electricity for the population rate is increased;
- ✓ The effectiveness of the national energy system is improved (production, transmission and energy consumption);
- ✓ Public bodies responsible for the provision of energy services are able to fulfill their role and mission.

Expected results:

- Low-carbon systems installation and power distribution and extension and reinforcement of the electricity network
- The effectiveness of the national energy system is improved (production, transmission and energy consumption)
- Implementation of energy efficiency measures
- Programming capabilities and actions of public bodies in charge of energy are strengthened.

Civil Society

These actions will be implemented consistent with and complementary to those funded by the thematic programs "Organizations of civil society / local authorities" on the one hand and "European Initiative for Democracy and Human Rights" on the other.

Other support measures

A specific allocation of 13 MEUR is expected to fund a support facility (Technical Cooperation Facility, FCT) and support to the NAO. The aim will be to support the programming, preparation or implementation of actions included in the programming.
